**11<sup>th</sup> Grade – U.S. History II Honors**  
**Full year course**

**Course Description:** In an age of rapid change and growing complexity, it is imperative that students develop critical thinking skills, knowledge and an understanding of the American experience of which they are a part. Further, it is vital that they be able to place this knowledge and understanding in its global context. The relationships between history and diverse cultural factors offer students the opportunity to gain a more meaningful understanding of American life and our cultural legacy.

This one-year survey of our nation's history from the early 20<sup>th</sup> century to the present day emphasizes the transition of the United States from a rural, agricultural society to a heterogeneous, urbanized, industrial society. The development of the United States as a world power is seen through the growing international presence of the nation beginning with World War I. An examination is made of the economic and social structure of the periods of the Progressive Era, the "Roaring Twenties" and the Great Depression. World War II and the postwar period mark the maturation of the United States as a world power and consumer society, while the Vietnam conflict and the social changes it wrought mark a new era in U.S. development. The course continues with an examination of U.S. domestic and foreign policy in the post-Watergate era through the War on Terror. The final unit examines global and domestic issues facing the U.S. in the last decades of the 20<sup>th</sup> century and into the 21<sup>st</sup> century. Students will examine how media uses different messages to shape public opinion on important and controversial issues both past and present. Students will examine present-day problems as an outgrowth of past trends, in an effort to prescribe solutions to those issues. Ongoing exploration and knowledge of current events is stressed throughout the year. In addition, students are expected to read and write about 2-3 historical works (approx. 300 pages each) at various points throughout the year. Successful completion of a research paper is a requirement to receive credit for the class.

## Unit 1: The Emergence of Modern America (1890 – 1930)

<p><b>Standard 6.1 (U.S. History)</b></p> <p><b>U.S. History: America in the World:</b> All students will acquire the knowledge and skills to think analytically about how past and present interactions of people, cultures, and the environment shape the American heritage. Such knowledge and skills enable students to make informed decisions that reflect fundamental rights and core democratic values as productive citizens in local, national, and global communities.</p>	
<p><b>Big Ideas:</b> <i>Course Objectives / Content Statement(s)</i></p> <ul style="list-style-type: none"> <li>- <b>Government and social reforms</b></li> <li>- <b>United States becomes a Global power</b></li> <li>- <b>Technology and economic growth</b></li> <li>- <b>Struggle between competing notions of democracy</b></li> <li>- <b>Redefining notions of democracy</b></li> </ul>	
<p><b>Essential Questions</b></p> <p><i>What provocative questions will foster inquiry, understanding, and transfer of learning?</i></p>	<p><b>Enduring Understandings</b></p> <p><i>What will students understand about the big ideas?</i></p>
<p><b>Student Choice Summer Reading 1900-1950:</b></p> <ol style="list-style-type: none"> <li>1. How to read, write and present book reviews?</li> <li>2. How to contribute to democracy’s “marketplace of ideas” by sharing and listening to ideas in an intellectual community?</li> <li>3. Exploring ways to relate to history through personal interests and cross-curricular connections?</li> <li>4. Analyzing and drawing conclusions about how our understanding of historical and current events are influenced by each other?</li> <li>5. How to build media literacy, consider an author’s bias, and the perspectives of others? How do the books/topics read by others and any associated ideas relate to what I read?</li> </ol>	<p>Historical knowledge is more likely to be committed to long-term memory if there is ownership over how it is studied. Therefore, the same historical themes/units (e.g. World War II, Civil Rights Movement, etc.) can be learned by exploring different combinations subject areas and historical events. For example, the Civil Rights Movement can be studied using any of the following events: the life of Malcolm X, segregation during World War II, the role of jazz music, the impact of the War on Drugs, the legacy of Brown v. Board and school desegregation, or the achievements of African-Americans in the U.S. Space Program. The same core content is learned through approaches that pique the interest of different students.</p> <p>Understanding that different authors/scholars, as well as everyday people, draw different conclusions about the same events gives students confidence to develop their own perspective, while also helping them appreciate the importance of knowing and listening to different perspectives.</p>

<p><b>What are the causes and effects of government reform?</b></p>	<p>There rarely, if ever, are clear-cut “right” or “wrong” answers.</p> <p>Practicing applying knowledge of historical events to personal experiences, interests and/or current events makes the content not only a collection of potentially interesting facts, but relevant and useful information to understand the surrounding world and problem-solve.</p> <p>Both the people and government play a role in creating reform at the local, state, and national level. For example, President Teddy Roosevelt, born into a wealthy family, was a federal government figure that broke up trusts and monopolies when he thought they threatened the American economy. However, Booker T. Washington, despite being born a slave, was not a government official but still an influential figure of Progressive reform at the local, state, and federal levels. He advanced African-American education, and was even invited to the White House by President Roosevelt.</p> <p>Different groups are constantly competing over which reforms are best. Many groups are unable to agree whether a particular reform will solve a problem or make it worse. Reformers such as Jane Addams built the Hull House to provide opportunities and support for newly arriving immigrants. However, groups such as the Ku Klux Klan thought immigrants were a threat to American society. They too saw themselves as reformers and supported legislation such as the Immigration Restriction Act that severely reduced immigration. This legislative support also built support for illegal methods such as lynching designed to discourage immigration.</p> <p>As more reforms are passed, government begins to play a larger role in the lives of</p>

**How do advances in technology and economic growth impact society?**

Americans. Some reforms began to regulate what kinds of substances people could consume, which was a completely new kind of law. This ultimately led to the Prohibition Amendment that restricted the production and sale of beverages containing alcohol.

Technological advances often lead to the loss of old jobs and the creation of new jobs. For example, when Henry Ford was able to adapt mass production to the manufacturing of cars it put many people involved in the horse-and-buggy profession out of work. Such advances change the way people live and work. As a result of such advances, working conditions and pay began to improve. Better transportation also led to the development of suburbs where people could work in cities, but keep their families sheltered from the ills of urban life. People do not always agree whether the benefits of technology and economic growth outweigh the negatives.

Due to the mass migration of African-Americans from the South to Northern cities, a culture unknown to the North begins to emerge. The center of this cultural explosion is seen in Harlem, NY where the Harlem Renaissance begins to take hold. Jazz music, African-American poetry, and new ways of thinking a few of the new trends/ideas that emerge during this period. During the 1920s the notion of mass media begins to take place in American culture. With developments such as tabloid magazines, big money newspapers, and the radio, America transforms from being a regional country to a more unified country that now shares a common culture. No longer did one only know what was going on in your area of the country. You now were aware of happenings all over.

<p><b>Why do countries go to war?</b></p> <p><b>How does the United States' role as a world power impact societal and governmental notions of democracy home and abroad?</b></p> <p><b>How is this relevant today?</b></p>	<p>During the beginning of the 20<sup>th</sup> century, America starts to expand their ideas of manifest destiny outside of the country to other areas within the Western Hemisphere and beyond. Through conflicts such as the Spanish-American War and World War I, America begins to emerge as not only a force to be reckoned with within the Western Hemisphere but the World. America starts to extend their ideas of democracy to other nations around the world and we also start to believe that it is our responsibility to help out our neighboring countries in need. At the same time, the question of what rights and civil liberties expressed in the Constitution that Americans should have in time of war comes into question during the first World War.</p> <p>Current debates over government option healthcare and immigration reform exemplify in the Progressive Era history that continues to struggle with notions of the public good, individualism, equal opportunity, and national security. Also, our roles in Afghanistan and Iraq following 9/11 are consistent with the prominent role of the U.S. in world affairs that increased significantly following the Spanish-American War.</p>

#### Global Perspectives

- Students will research key issues that compare American colonialism circa 1900 with America's influence in the Middle East (e.g. Syria, Afghanistan, Iraq, etc.)
- Examine the political, economic, and social development of the Philippines today. To what extent did the Philippines benefit from Progressive reforms of the early 1900s. Compare U.S. methods/influence on the Philippines with the Middle East today.

#### Culturally Responsive Teaching:

- Excerpts from The Jungle written by Upton Sinclair

Poems "White Man's Burden" by Kipling and "Real White Man's Burden" by Crosby

Excerpts from All Quiet on the Western Front by Remarque

Excerpts from Summit: City on a Hill on Summit in WWI

- Analyze the ideas of different Harlem Renaissance thinkers (e.g. Langston Hughes, James Weldon Johnson, etc.) to compare how they reflect the sentiment of the decade. How do historians connect them to subsequent Civil Rights Movement?

## Unit 2: Great Depression and World War II (1930 – 1945)

<p><b>Standard 6.1 (U.S. History)</b></p> <p><b>U.S. History: America in the World:</b> All students will acquire the knowledge and skills to think analytically about how past and present interactions of people, cultures, and the environment shape the American heritage. Such knowledge and skills enable students to make informed decisions that reflect fundamental rights and core democratic values as productive citizens in local, national, and global communities.</p>	
<p><b>Standard 6.3</b></p> <p><b>Active Citizenship in the 21<sup>st</sup> Century:</b> All students will acquire the skills needed to be active, informed citizens who value diversity and promote cultural understanding by working collaboratively to address the challenges that are inherent in living in an interconnected world.</p>	
<p><b>Big Ideas:</b> <i>Course Objectives / Content Statement(s)</i></p> <ul style="list-style-type: none"> <li>- <b>Underlying indicators of impending economic meltdown</b></li> <li>- <b>Economic and social instability of the 1930s</b></li> <li>- <b>Expansion of government to fix economic and social problems</b></li> <li>- <b>America’s last attempt to remain neutral in world affairs</b></li> <li>- <b>America’s emergence as the true superpower in the world</b></li> </ul>	
<p><b>Essential Questions</b></p> <p><i>What provocative questions will foster inquiry, understanding, and transfer of learning?</i></p>	<p><b>Enduring Understandings</b></p> <p><i>What will students understand about the big ideas?</i></p>
<ul style="list-style-type: none"> <li>- <b>What are the causes and effects of government reform?</b></li> </ul>	<p>Students will understand that...</p> <p>The Stock Market Crash challenged the accepted notions from the 1920s that the U.S. economy could stabilize and expand without support from government resources at the local, state, and federal level.</p>

	<p>President Roosevelt’s New Deal continued to build on the spirit of reform from the Progressive Era, particularly at the federal level with ideas such as Social Security and the Federal Deposit Insurance Corporation. At the same time, the growth of power at the federal level ignited a new round of fears that U.S. democratic and religious institutions were being threatened by socialist/communist revolution. The necessity of fighting World War II quickly unified the American people and generated a level of government spending that took unemployment from a lingering fifteen percent and greater to virtually zero.</p>
<p><b>How do advances in technology and economic growth impact society?</b></p>	<p>The need to more efficiently produce an ever-growing number of sophisticated products for the military made war even more destructive and destabilizing than it had been during World War I. For example, the aircraft and the atomic bomb seamlessly brought civilian populations into the heart of warfare. However, advances in areas of medicine, such as penicillin, and the industrial application of plastics and aluminum also led to one of the greatest increases in the standard of living for Americans and other countries across the globe.</p>
<p><b>How does the United States’ role as a world power impact societal and governmental notions of democracy home and abroad?</b></p>	<p>...that at the end of WWI, America tried to scale back its involvement in global affairs/conflicts. This was seen through such things such as the Neutrality Act of the 1930s. With the emergence of authoritarian governments in Germany and Japan, America begins to realize that Wilson’s goal of making the world safe for democracy can only be done through direct American involvement. Starting in 1941, America became involved in the 2<sup>nd</sup> World War against Germany, Japan, and Italy. It is during this period at home where we see the rationing of food, supplies, and so on by the American public to aid soldiers abroad. Due to the absence of men, women begin to play</p>

<p>How is this relevant today?</p>	<p>an extremely important role in the production of equipment to aid in the war. At the conclusion of this conflict, America will emerge as the lone superpower in the world with a new enemy that will keep the country occupied for the next 50 years – The Soviet Union.</p> <p>...that the events of the 1930s and 1940s has had a lot of relevance for today. At the end of World War II, America entered into the Atomic Age due to the creation of the nuclear bomb. Due to the horrific effects of this weapon, it is important to make sure that weapons of mass destruction do not get into the hands of the wrong. This never ending has been the major fuel for today's war on terror. This is also the period when America starts to embrace their role of global policemen, which it still holds to this day. The 1930s saw a historic period in which the American government expanded in order to tackle the problems of the Great Depression. This idea of the role of government in society is still and will always be a major area of debate.</p>

- Analyze how the aftermath of World War II, particularly for the European countries involved, will have an effect of post 1945 decolonization in Africa, the Middle East, and Asia.
- Compare America's role in the world in the aftermath of WW II to its current role. How do different historians view America's position as a global power from WW II to the Cold War to the War on Terror? Use different news articles and books to determine why many countries have responded to U.S. foreign policy differently.

**Culturally Responsive Teaching:**

Evaluate the impact of WWII on race relations in the U.S. during/after the war examining African American, Hispanic and Asian experiences.

-

**CCS #6 (Craft and Structure)–Evaluate authors' differing points of view on the same historical event or issue by assessing the authors' claims, reasoning and evidence.**

**CCS #9 (Integration of Knowledge and Ideas)– Integrate information from diverse sources, both primary and secondary, into a coherent understanding of an idea or event, noting discrepancies among sources.**

**S.T.E.A.M. (Science, Technology, Engineering, Arts, Mathematics):**

Examine impact of developments in science and technology on war effort (i.e. aviation, atomic energy, medicine/penicillin) etc

### Unit 3: Post War United States (1945 – 1975)

**Standard 6.1 (U.S. History)**

**U.S. History: America in the World:** All students will acquire the knowledge and skills to think analytically about how past and present interactions of people, cultures, and the environment shape the American heritage. Such knowledge and skills enable students to make informed decisions that reflect fundamental rights and core democratic values as productive citizens in local, national, and global communities.

**Standard 6.3**

**Active Citizenship in the 21<sup>st</sup> Century:** All students will acquire the skills needed to be active, informed citizens who value diversity and promote cultural understanding by working collaboratively to address the challenges that are inherent in living in an interconnected world.

**Big Ideas:** *Course Objectives / Content Statement(s)*

- **The Cold War conflict – its causes and effects (home and abroad)**
- **Civil Rights Revolution of the 1950s and 1960s**
- **The conservative 1950s and the eventual cultural Revolution of the 1960s**
- **The New Frontier and Great Society**
- **The Vietnam War**
- **The Watergate debacle**

**Essential Questions**

*What provocative questions will foster inquiry, understanding, and transfer of learning?*

**Enduring Understandings**

*What will students understand about the big ideas?*

- **What are the causes and effects of government reform?**

Students will understand that...

The growth of the government as a result of the New Deal and WW II continues to develop throughout the 1950s and 60s. For example, the Federal Interstate Highways played a major role in the development of suburban communities. Such changes in housing also became one of the major challenges of promoting racial equality. The government did respond to the pressure to begin desegregating the military in 1948; schools with *Brown v. Board* in 1954; and jobs, public accommodation, in suffrage in the Civil and Voting Rights Act in 64' and 65. However, de facto housing pattern discrimination continued to keep many urban populations segregated, especially as the draw of suburban seclusion became more accessible. Many events associated

American freedoms and civil liberties expressed in the Constitution are put to the test during the period known and McCarthyism. What the government is allowed to do in the name of national security will be questioned during this period.</p> <p>Current debates over legislation related to gay marriage/rights, healthcare and immigration continue to test the boundaries of how much the government can be influenced by differing notions of the public good to competently reform social and economic problems. The extraordinary growth of nations such as China and India, as well as the European Union, is creating a world that is no longer influenced by a unilateral U.S. foreign policy. This is a lesson that first gained most ground as a result of U.S. failures in Vietnam.</p>

**Instructional Strategies:**

Interdisciplinary Connections

- English and History: Students will read part of the *Crucible* in order to understand how it was a critique of McCarthyism
- Literature: “Letters from a Birmingham Jail” – Dr. Martin Luther King, Jr.
- Excerpts from the Autobiography of Malcolm X
- Science: Explore the chemical compositions of Agent Orange and Napalm to understand how they impacted Vietnam Veterans, civilians and environment.

Technology Integration

- Start a blog that asks the extent to which the Civil Rights Movement was successful.
- Develop a website that uses photography and interviews to document the lives of Vietnam Veterans

Culturally Responsive Teaching:

Evaluate changing attitudes in Post WWII America toward race, ethnicity, nationality, gender, and sexuality.

Global Perspectives

- Students will analyze the threat of nuclear weapons during the Cuban

- 9/11 & The War on Terror

<b>Essential Questions</b> <i>What provocative questions will foster inquiry, understanding, and transfer of learning?</i>	<b>Enduring Understandings</b> <i>What will students understand about the big ideas?</i>
---	---

<p><b>What are the causes and effects of government reform?</b></p>	<p>Students will understand that...</p> <p>The failures of the Nixon, Ford, and Carter administrations led to both the restructuring of the Republican Party platform as well as a repudiation of reforms led by Democrats during the 1960s, particularly those related to Johnson’s Great Society and the Civil Rights Movement. It is debated whether ideas of trickle-down economics, outsourcing and breaking unions, and reducing social programs related to welfare are responsible for decreasing the standards of living in urban neighborhoods, especially those with significant minority populations. Others look at behavior associated with gangs, drugs, teen pregnancy, and school dropout rates as proof that government spending can’t stop people from making poor decisions. Although less money is spent on social programs during the Reagan years, increases in defense spending and corporate subsidies drive up the national debt significantly, a trend that has continued to grow with little interruption. Following 9/11 amid a growing awareness of the threat that terrorist groups and the nations that sponsored them posed, the U.S. began its most unified foreign policy since the Cold War. Concerns over security have rekindled the debate between national security and civil rights for the first time since the Vietnam/Watergate Era. New legislation, such as the Patriot Act is met with a combination of staunch support and skepticism.</p>

**How do advances in technology and economic growth American society and international relations?**

The wars in Iraq and Afghanistan have seen the utilization of technologies, such as the predator drones, that have attempted to deliver deadly strikes against enemy forces, while trying to limit civilian casualties. Military technology that was deemed crucial to winning the Cold War, such as fighter aircraft, tanks, etc. have become increasingly useless in achieving the types of objectives that need to be accomplished. Concerns such as nuclear proliferation require the weapon of effective intelligence gathering more than anything else. This trend is not entirely new and it does evoke the problem that was faced when tremendous levels of American firepower could not achieve victory in Vietnam. Technology and the economic growth surrounding the explosion of personal computing and the Internet have aided the development of such military technology; however, such computer technology has also made it increasingly difficult to control the flow of media. Watchdog websites, such as Wikileaks, have been simultaneously praised as holding the U.S. accountable for civilian casualties, while being resented for its goal of publicly posting classified documents that could threaten U.S. foreign policy goals.

- **How and why has the United State's alliances and role as a world power changed? Which countries are challenging U.S. power, and how has that affected democratic institutions at home and abroad?**

...during this period America saw its tensions with the Soviet Union in the form of the Cold War finally come to an end but with the end of one conflict, a new conflict would eventually come to define America's foreign policy in the 21<sup>st</sup> century: terrorism. At the end of the Cold War, America began to fully embrace the role of world policemen with its involvement in Panama, Grenada, Kuwait, Somalia, and the former Yugoslavia. The ideas of bringing democracy and ridding these places of oppressive rule was the major focus with America's involvement in these areas. America has now tried to bring these same notions of democracy to Afghanistan and Iraq but at a heavy price due to resistance from elements within these countries.

<p>- <b>How is this relevant today?</b></p>	<p>America has also grappled with notions of democracy at home during the 21<sup>st</sup> century in the midst of our fight against terrorism with such legislation as the Patriotic Act – calling back memories of our government during World War I.</p> <p>...the events of unit 4 bare extreme relevance to today’s society. The origins of global terrorism and groups were at conflict with such as the Taliban are directly related to America’s last decade of involvement in the Cold War. The financial crisis that affected American society in the 1<sup>st</sup> decade of the 21<sup>st</sup> century can be traced to changes in government philosophy during the 1980s. The extremely vocal conservative right in today’s politics saw it rise with the ascension of President Reagan. Overall, students will understand that a better understanding of global affairs and domestic policies can be better understood with knowledge of unit 4.</p>

## Media Literacy Skills

### **Students will be able to:**

- Consume and produce various forms of media (film, television, radio, internet, etc.) as a 21<sup>st</sup> century tool to think critically and problem solve.
- Formulate questions and hypotheses from multiple perspectives, using multiple sources.
- Gather, analyze, and reconcile information from primary and secondary sources to support or reject hypotheses.
- Examine source data within the historical, social, political, geographic, or economic context in which it was created, testing credibility and evaluating bias.
