

**Gr. 6 Film Studies**  
**Length of Course: One Quarter**  
**Revised: 2017 - 2018**

**Curriculum**

**Course Description:** Literature is an incredibly effective way to teach children, but it does not reach all students. Whether they are struggling readers, cannot connect with the subject, or simply do not enjoy reading. Simply stated, books can cause some students to shut down. Although they are not adequate substitutes, movies present alternative ways of telling a story. They also appeal to students who with visual and auditory learning styles.

This course will examine the history of film ranging from silent films to moderns classics. Concurrently key concepts from other disciplines will be included into the curriculum in an attempt to lay foundational knowledge, reinforce existing understanding, or deepen understandings of topics related to the students' core classes.

**Big Ideas:** *Course Objectives / Content Statement(s)*

- A basic understanding of film production, writing, and genre can greatly enhance the viewing experience.
  
- Nearly all films offer learning opportunities to those who watch with a keen eye.

<p><b>Essential Questions</b> <i>What provocative questions will foster inquiry, understanding, and transfer of learning?</i></p> <ul style="list-style-type: none"><li>● Without words, how can stories be told?</li> <li>● Is film a form of literature?</li></ul>	<p><b>Enduring Understandings</b> <i>What will students understand about the big ideas?</i> Students will understand that...</p> <ul style="list-style-type: none"><li>● Films are dependent on music, props, setting, camera shots and angles in order to tell their stories.</li> <li>● Films are legitimate forms of literature that can be interpreted, analyzed, and discussed using the same</li></ul>

Simultaneously, students will be, given the tools to begin viewing films as learning experiences that can introduce them to new ideas, enhance their current knowledge of a topic, and expand their worldview.</p> <p><b>Sample Assessments:</b>  -Stop Motion Group Project (Silent Film)  -Movie Trailer Group Project (Archetypes/English))  -Mini Documentary Individual Project (Documentaries/Social Studies)  -Public Service Announcement Group Project(Science)</p> <p><b>Instructional Strategies:</b>  -Teacher Directed: Film techniques, genre introduction.  -Whole class: Film discussions.  -Group: Problem-based projects mentioned above.</p>

### 3: Interdependent Relationships in Ecosystems

8.1 Educational Technology: All students will use digital tools to access, manage, evaluate, and synthesize information in order to solve problems individually and collaborate and to create and communicate knowledge.

-Individual: Mini-documentary.

#### **Interdisciplinary Connections:**

-**English:** Study of archetypal characters and plots, theme, and visual symbolism.

-**Social Studies:** Application of the eight traits of culture within a documentary.

-**Science:** Environmental impact (The Lorax).

#### **Technology Integration**

-Students will use cameras to film and photograph subject matter for all projects.

-Students will use iMovie or online editing tools to produce movies.

The following apps/extensions will be used to design the technology integrated products:

- ❑ [WeVideo](#) used for storyboard development, recording, editing and advanced production tools (green screen, special effects). Student work can be shared in a format similar to Google Classroom, work can be reviewed by teachers, students can collaborate in real-time on each project. ([WeVideo Academy](#) contains tutorials for students to independently follow.)

- ❑ Google Story Builder - can be used to develop a story outlining characters, and further develop writing skills to draft text. Can also support music integration
- ❑ Flipsnack - use for the development of flipbooks, students can create PDFs that can then be transformed into online books. Students can share and embed into websites and blogs.
- ❑ YouTube - Timelapse Function can be used to create the stop motion videos. See [tutorial](#)
- ❑ [Stop Motion Animator App](#) - students can use the webcam on the Chromebook or phones to add images to create a stop motion video  
[YouTube Tutorial](#)
- ❑ [Stop Motion Studio](#) - can be used with an iPhone or iPad if students prefer to use this device to choose from 7 effects and change the backgrounds using a green screen
- ❑ [PlayPosit](#) - Teacher directed lessons can use this application to create interactive videos that would require student responses, assessments and discussion at selected points throughout.

Additional tools for unit activities could include:

- ❑ [Pixlr](#) - Photo Editor for students if students choose to take their own photos and need to enhance and/or edit for the documentary and stop motion film
- ❑ [VideoNot.es](#) - Students can take notes while viewing any video from YouTube.  
All notes are saved and sync in a Google Drive folder (timestamped and easy to edit)
- ❑ Google Slides - Using the Explore feature combined with

	<p>Google Drawing, students can design images for the PSA, archetype and pictures for the trailer.</p> <ul style="list-style-type: none"> <li>❑ Google Forms can be used to collect feedback for peer assessments upon reviewing trailers and mini-documentaries</li> <li>❑ <a href="#">MindMup</a> - free online mind mapping tool that can be used for brainstorming, note taking and/or threading connections for the work that will be viewed during this course</li> </ul> <p>Additional resources:</p> <ul style="list-style-type: none"> <li>❑ Film Foundations Curriculum Guides - <a href="#">The Story of Movies</a></li> <li>❑ <a href="#">How to Close Read the Language of Film</a></li> <li>❑ <a href="#">Teacher's Guide to Analyzing Motion Pictures</a> - Library of Congress</li> <li>❑ <a href="#">Teachthought</a> - Teaching with Movies and Film</li> </ul> <p><b>Global Perspectives</b>      -"Happy" Documentary--&gt; Explores the interpretation of happiness as reflected by several cultures around the world. The documentary directly illustrates the eight traits of culture examined throughout the eighth-grade curriculum.</p>

*The following skills and themes should be reflected in the design of units and lessons for this course or content area.*

21st Century Skills:

Creativity and Innovation: Students apply classroom knowledge to subjects the extend beyond structured curriculum.

Critical Thinking and Problem Solving: Students identify and use a variety of technological resources, many of which they must work independently to understand.

Communication and Collaboration: Students work collaboratively on a variety of projects throughout the marking period. They communicate both in person and online to achieve completion of their academic goals.

Information Literacy: Students learn that film is a legitimate source of knowledge and education.

Media Literacy: Students learn about themes found in film.

Life and Career Skills: Children learn how to manage time during long-term projects.

*21st Century Themes (as applies to content area):*

Financial, Economic, Business, and Entrepreneurial Literacy:

Civic Literacy: Identifying bias in the media.

Health Literacy: Identifying the negative impact of advertising on one's mental health.

*21st Century Themes (as applies to content area):*

Financial, Economic, Business, and Entrepreneurial Literacy: N/A

Civic Literacy: Exposure to documentaries opens a new window for students to educate themselves about underreported local, national, and international stories.

Health Literacy : N/A
